

HUFFER ROAD SPOT SAFETY IMPROVEMENT PROJECT

JUNE 2016

This informational newsletter will provide periodic updates (as needed) on the status of the Huffer Road Spot Safety Improvement Project and communicate upcoming activities to local residents.

CURRENT PROJECT STATUS

HIGHWAY CONSTRUCTION PROJECT TO START

This is a Monroe County Department of Transportation contract. The contractor for the project is DiFiore Construction, and the engineer for the project is Popli Design Group. Following utility relocation work, the project is scheduled to begin on or about July 11, 2016.

The project involves the reconstruction of Huffer Road at the sharp 90 degree curve between Bennett Road and Lake Ontario State Parkway. The improvements include pavement reconstruction with improved curve radius and superelevation, grading, new closed drainage systems, pavement markings, and signage.

The contractor has been awarded a contract to begin highway construction work and will begin work by stripping topsoil, establishing erosion control devices, and then begin various drainage improvements. Some mailboxes may be temporarily displaced during construction; they will remain fully functional in a temporary location and will be restored to their original location before the end of the project.

At some points during each day there will be alternating one-way traffic with flaggers, but a full road closure will not be required. For the safety of the workers and public, please obey the flaggers. The project is scheduled to be completed by mid September.

This project involves coordinating several construction activities, and we ask for your patience throughout the project.

You may call the Resident Engineer, Jen Vazquez, at 964-7459 to address any concerns you may have during construction.

PROJECT CONTACTS

Full time inspection staff will be on-site daily working with the contractor. During construction, if you have an emergency, question or concern regarding the work in progress or other circumstance, please contact our Resident Engineer at the number below.
